A song that greatly impacted my life and relevance to TowerJazz

- Tapestry (1972, Carole King)
 - When I was 17 years old; The lyrics touched me deeply, “How do I create a tapestry of my life?”

*“My life has been a tapestry of rich and royal hue,
An everlasting vision of the ever-changing view
A wondrous woven magic in bits of blue and gold
A tapestry to feel and see, impossible to hold.”*

A song that greatly impacted my life and relevance to TowerJazz

- Some additional thoughts:
 - No single beautiful line or few lines of thread make a beautiful tapestry => a beautiful tapestry is based upon consistently adding beautiful lines
 - A very poorly done line can totally distract and or destroy the tapestry
 - Hence – if a serious mistake is made – it must be found immediately and corrected
 - It's ok to make mistakes (but correct them fast)
 - If you wait too much time – everything from the point of mistake onwards – must be ripped out of the tapestry

Worldwide Manufacturing Facilities

Global capacity assurance and flexibility; all major flows are cross qualified at multiple sites

CMOS, CIS, RF, Power

- 
- 6" facility, built in 1983 in Migdal Haemek, Israel
 - Main products: power discrete, analog switch gates and some Image Sensors
 - Still running at 90% utilization – benefit of analog business model

Fab1

- 8" facility, in Migdal Haemek, Israel
- Main products:
 - Industrial and x-ray image sensors, cinematography
 - RF SOI
 - Power Management
 - Power Discrete
 - Transient voltage suppression (TVS)

To note: there is vertical revenue growth as well – Fab2 has increased 10X in revenue over past 12 years by having rich customer aligned product roadmap offerings

- 8" facility, in Newport Beach, CA
- Main products:
 - RF SOI switches, LNAs and PA controllers
 - SiGe PAs
 - SiGe wireline optical and mmWave
 - IR cameras
 - Various A&D and ITAR restricted A&D

To note: there is vertical revenue growth as well – Fab3 has more than doubled in revenue since 2008 acquisition

- 8" facilities, in Tonami and Arai, Japan
- Main products:
 - Additional capacity for Power Management/ Mixed-Signal growth beyond Fab2
 - Big automotive portfolio
 - Power discrete
 - CCD Camera
 - Embedded memory
 - CIS security camera and most advanced industrial vision

- 12" facility, in Uozu, Japan
- Main products:
 - Extension of present roadmap
 - 65nm RF SOI/ LNA
 - High end studio camera
 - Advanced mixed-signal
 - New served markets:
 - 65nm best-in-world power 5-16V BCD
 - Game changing CIS x-ray
 - Game changing high-end DSLR
 - Game changing broadcast camera

- 8" facility, in San Antonio, Texas
- Main products:
 - Long term automotive power contract
 - Capacity for power discrete, RF and power management

New Superordinate “Mega” Trends

What is coming next...

The background image is a blue-tinted photograph of a car, likely a sedan, shown from a side-front perspective. Overlaid on the image are several digital and technological elements: concentric white circles emanating from the front of the car, suggesting sensor range or radar; a grid of white lines and dots, possibly representing a sensor fusion or mapping algorithm; and vertical columns of binary code (0s and 1s) on the left side. The overall aesthetic is futuristic and tech-oriented.

Automotive & Autonomous Driving

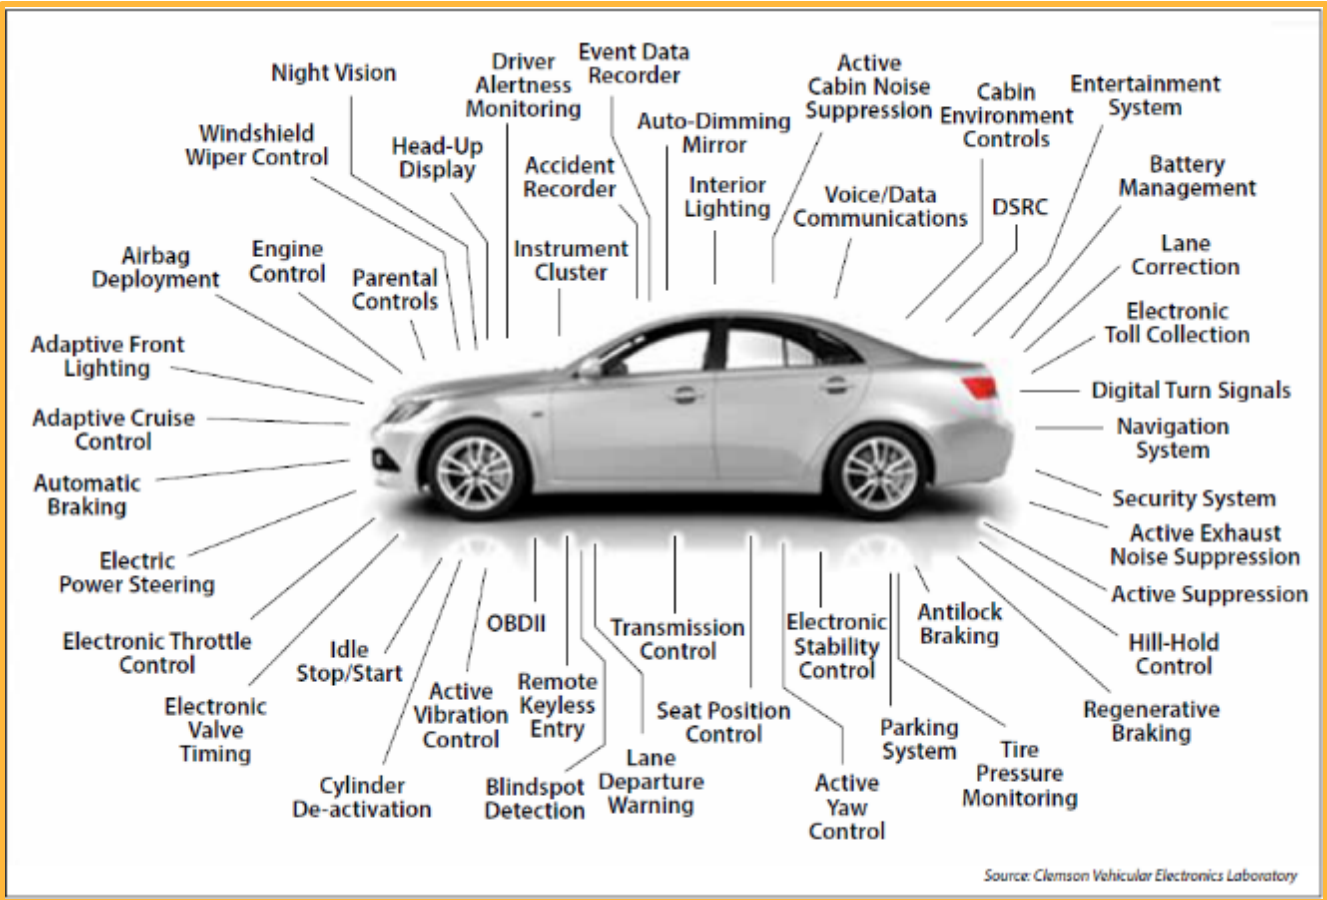

The Sensor Fusion
Experience

Digitization of the automobile is driving rapid growth in electronic content

Electronics as % of Cost in an Automobile

Automotive Electronics Systems

Automotive Market Focus

- Automotive is the **fastest growing** and the **third largest** end-use IC market
- Nearly **70%** of Automotive IC content is **Analog**, well aligned to TowerJazz Specialty Analog technologies
 - **Power** for EV/Hybrid battery management
 - **RF** for connectivity and Radar (Example: Denso/Toyota partnership announced)
 - **Sensors** for ADAS (Example: FLIR IR night vision partnership announced)

Autonomous and Advanced Driver Assistance Systems (ADAS)

360° coverage required | 6-8 cameras per car | VGA moving to HD | High Dynamic Range | Near IR vision | LIDAR for accurate ranging

“TowerJazz’s leading SiGe technology enabled us to create the collision avoidance system which is our flagship offering. TowerJazz’s advanced process enabled the engineers to fully achieve the challenging specs required for next generation short range radar (SRR) for automotive applications. This solution allows DENSO to be a world leader in supplying collision avoidance systems for automotive safety.” (Denso, Director, Advanced Safety Engineering)

“We chose TowerJazz for its advanced pixel technology, specially customized for our CMOS image sensor chips addressing very high volume markets. Together with our technology, we were able to demonstrate a 4X better sensitivity to our customers. TowerJazz’s CIS offering is proven in the industry and we are pleased to manufacture locally in Israel with a leader in the global analog foundry space.” (Newsight Imaging, CEO).

Artificial Intelligence

Experiencing the World Differently

AR/VR – 3D ToF sensors and OLED on Silicon displays

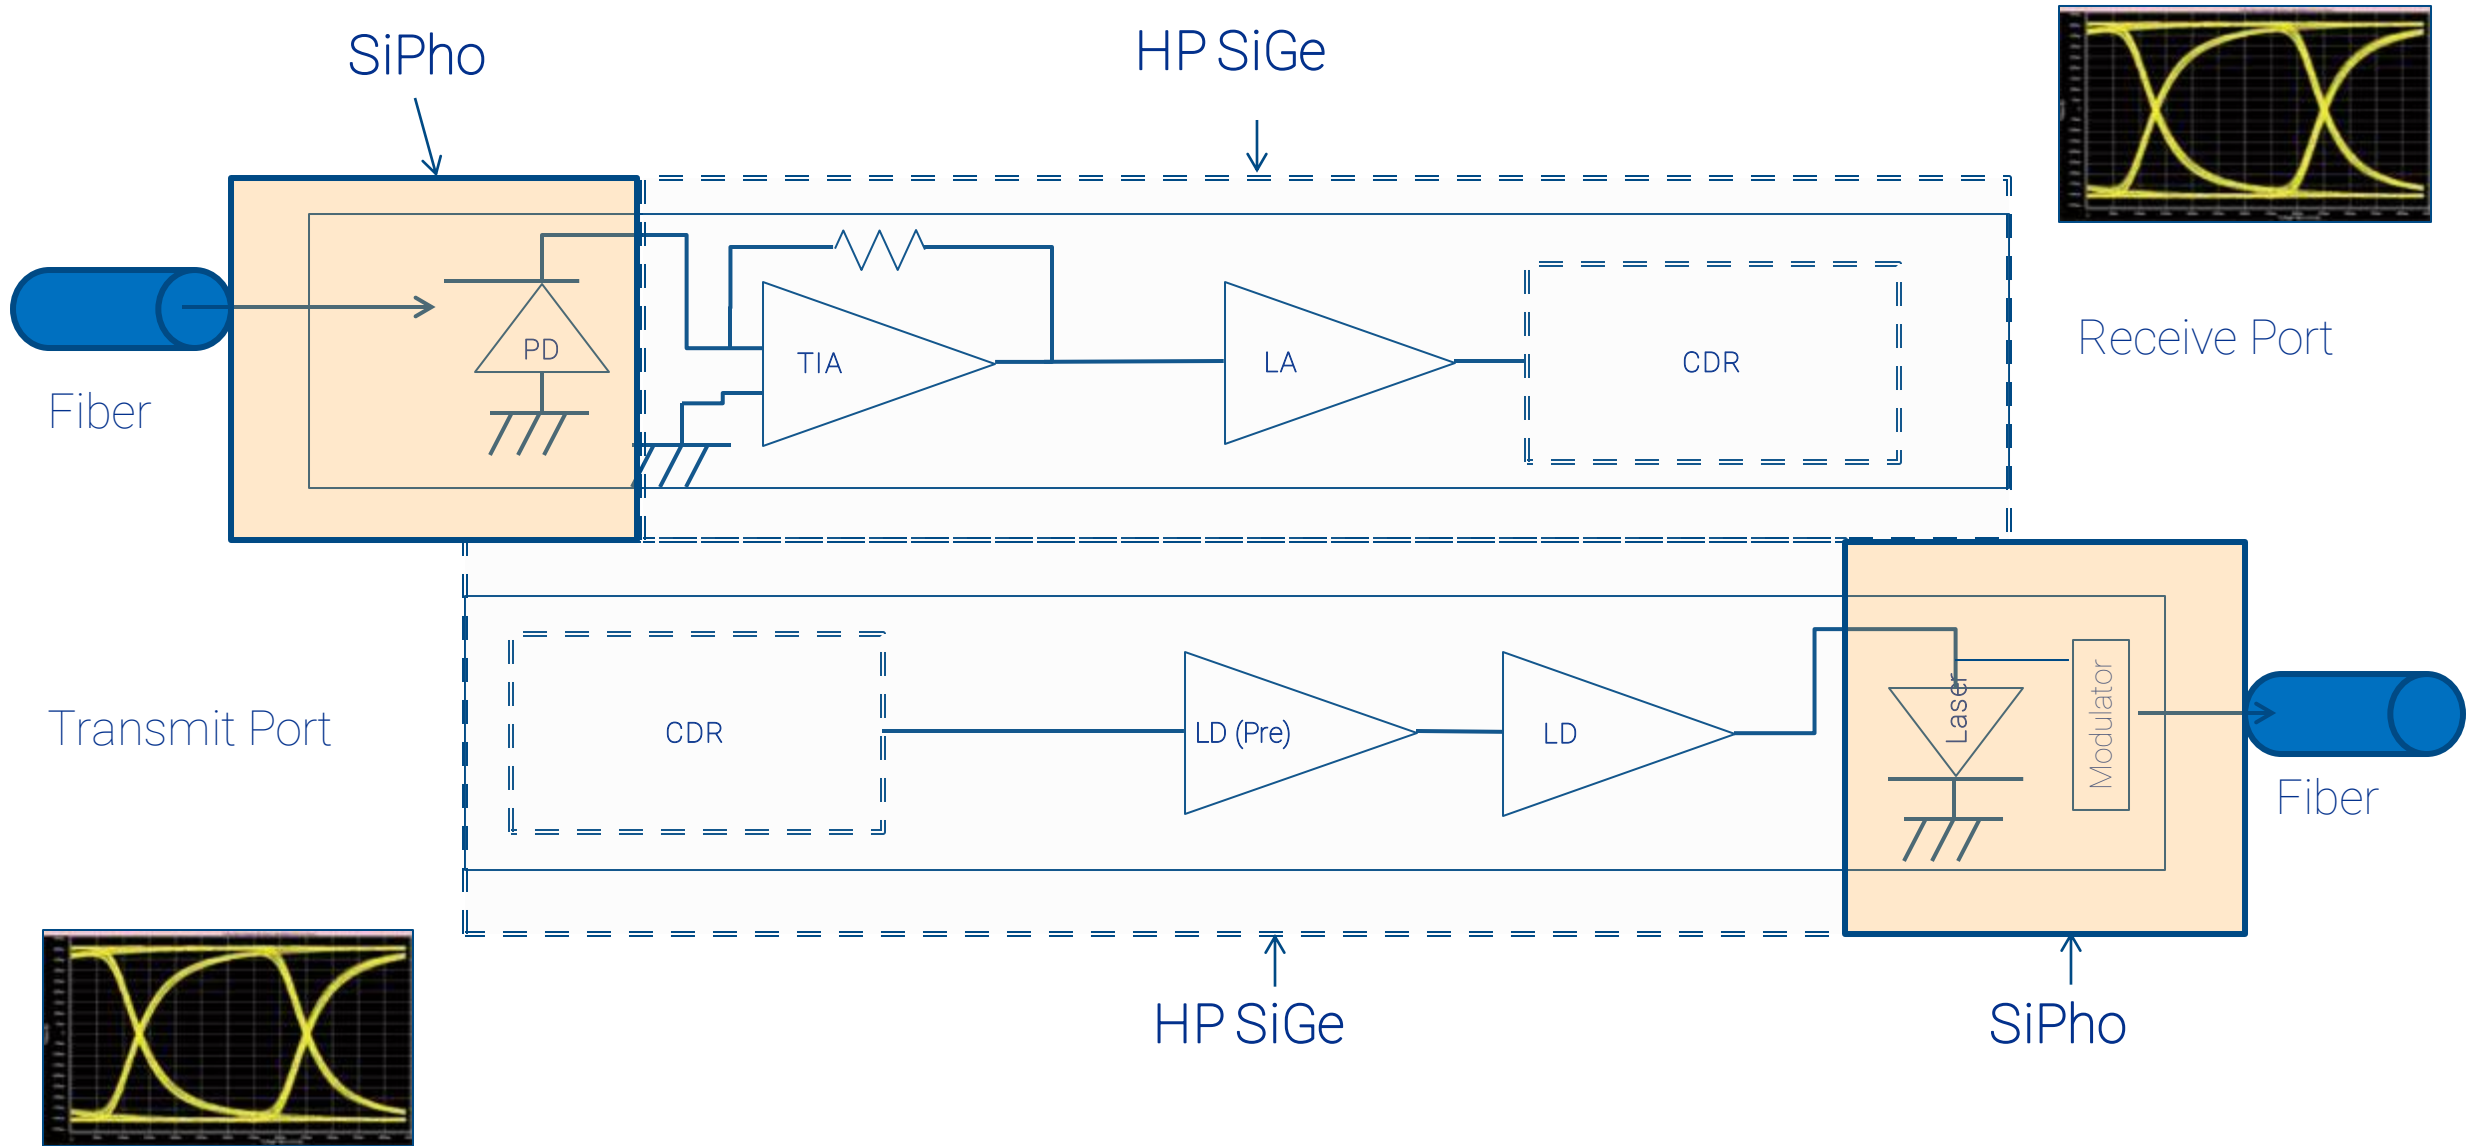

Time of Flight Sensing

- Simple idea: measure the time it takes for light to return from the object
- Two detection mechanisms that trade off between speed and SNR
 - Active Gating: Ultrafast Global shutter technology for real-time imaging, but lower SNR
 - Single photon Avalanche diode (SPAD): Highest SNR but relatively slower due to “quenching” required

Optical Fiber Components Enabled by TowerJazz HP SiGe and Si Pho

Partnerships and M&A Strategy

■ Increase Served Market and Technology Offering

- Acquire new technologies w/ established customer base
- Acquire new technologies which serves existing base
- Acquire existing foundry (manufacturing and business)
- Green field predominantly funded by partners

■ Increase Operational Capacity and Flexibility

- Acquiring capacity at substantial lower cost than organic growth, coupled with long-term supply agreement
- Green field, predominantly funded by partners

Target Acquisitions

High-end technology
outside of present
portfolio

Low cost, regional
focused capacity
expansion

Under-valued, high
revenue asset
acquisition

Our Vision, Mission & Values

VISION

To be the world leader in specialty foundry solutions as measured by our customers, employees and investors.

MISSION

To bring to market specialty foundry solutions that provide unique value to our customers by attentively listening to and proactively providing for their needs, through attracting and retaining the best global talent to serve them.

VALUES

- Embrace a Customer Centric Mentality
- Foster a Culture Built on Mutual Trust and Respect
- Demand Quality and Excellence in Everything We Do
- Data Driven and Results Oriented
- Knowledge, Skills and Attitude, Focused on Collaboration and Innovation

Foundry Landscape

(\$M)	2005		2010		2015		2017		2017/16 Change	Accumulated Change

Highest Growth Foundry

Source: IC Insights, EE Times, TrendForce, Company Reports

* Compared to Chartered 2005 | ** Reported foundry business only, growth is against 2005 Powerchip revenue

Annual Revenues \$M

- Total revenue growth of 13.6X over 12 years
- Focus on quality growth, resulting in 2017:
 - Net profit of over \$200M
 - EBITDA of over \$400M
 - FCF of ~\$200M

Annual Revenues \$M - 5-year tracking till today

Our focus

- **Create value through customer partnership:**

- Protecting and growing high-end share of presently served markets
 - Cost effective model for capacity acquisition
- Organically increase into growing new served markets
- Acquire technologies with capacity, to enter new served markets where organic development would not create ROI
